

Thor Medical Systems is dedicated to deliver high quality, yet affordable equipment for the medical monitoring industry. Our success results from understanding our customer's needs, supplying products to meet those needs and support our products to each customer's satisfaction. Thor Medical Systems is a property of domestic private entrepreneurs.

Our main development is an innovative ultrasonic flow measurement technique, that is the WaveFront Technology.

We offer ultrasonic flow meters of all ranges on an OEM basis for various corporations for a number of applications, including but not limited to human medical ventilation testing, ventilation systems, spirometry, sleep apnea products and industrial systems, such as natural gas flow sampling.

An end user product is the WaveFront Spirometer, that is a highly cost efficient respiratory diagnostics device suitable for mass screening COPD and asthma.

We file patents on a regular basis, our patent portfolio is continuously extended both on national and international level.

We exhibit at Compamed / Medica in Düsseldorf, Germany, each year, as well as MEDTEC Europe and ERS, which are the most reputable international fairs on the field we serve our distinguished customers.
