

28/09/2012

- The members of the eHEALTH8 consortium took part in Researchers' Night on 28th September, 2012 presenting some of the project products. The aim of the event is promoting science and research careers. The consortium members were waiting the visitors at two locations: at Semmelweis University (Budapest) and at Bay Zoltán Nonprofit Ltd. (Miskolc). The latter was also a co-organizer of the seventh edition of the event supported also by the European Commission. Those who were interested could learn about and try out the exercises that support stroke rehabilitation with visual feedback and can be done at home by means of a tool system that suits to handicapped patients' needs and offering them participation in a controlled and supervised rehabilitation at home. In addition visitors could try out a memory game as well that supports rehabilitation of cognitive capabilities of patients. Moreover at Bay Zoltán Nonprofit Ltd. visitors could ride on the so-called "magic chair" that controls and drives a small car. At Semmelweis University visitors could perform pulmonary function tests by means of devices developed by Thormed Ltd. - also one of the consortium members -, and then could take home their printed test results.

25/05/2012
