Task type: experimental development

Professional management: HumanSoft Kft.

Participating consortium members:

- Bay Zoltán AKK
- HumanSoft Kft.
- University
- ThorMed Kft

In the course of eHEALTH8 project, the first milestone for designing the central system was the preparation of System Policy (clarifying data protection issues), followed by the design of the central base system in which the design of main business procedures was one of the priorities. In this developmental phase the software infrastructure of the central base system, as well as the application software was being developed and functionally tested. The professional coordinator of the development was HumanSoft Kft.

Results:

- Process models
- Economic models
- System models, system designs
- Designs of an endpoint measuring system
- Functionally tested central base system
